Total saving	£390
Cost of same day DocTap GP appointment	£44
<b>Net saving per DocTap GP appointment</b>	<b>£346</b>

# What our clients say...

---

“Dan wrote to the organisation to introduce the services of DocTap. Initially I was a little sceptical as it seemed too good to be true. I had a look at the website and saw how easy it was to book an appointment and we trialled the service with two employees. The employees gave DocTap 5/5 – commenting on how user friendly the process was to book an appointment, but more than that, the quality of service from the GP. We met with Dan, who quickly set us up and we launched the service to all of our London staff. The feedback has been strong from all our staff and we could not be happier with DocTap. Highly recommended!”

*Dimple Mistry, SVP Human Resources, GIC*

“As HR Administrator for Square One Resources I have always had a positive experience using the DocTap service. As a cost effective and a very reliable system it is now our main source of private GP’s within the company. DocTap is very easy to navigate and maintaining all appointments per employee in one place is simple. There is always someone on hand to answer any queries and the DocTap team are open to ideas and suggestions to help improve their service. When I was new to the system Dan went above and beyond to make sure I was comfortable and could easily navigate my way around. They offer access to great range of clinics across London, always a quick turnaround on appointments usually within the same morning! For myself, the whole process is very fast, takes only a few minutes start to finish to register an employee and book an appointment. DocTap works well within Square One as it caters to our busy working environment and fast paced requests. Would highly recommend!”

*Jennifer Greaves, HR Administrator, Square One Resources*
